Same VAST validation clip, exact O-TV-TVA plane | reused checkpoint, epoch 30
No PCA/t-SNE; radial order holds but cone membership fails.
Whole disk: outward and nearly aligned?
Angle at origin: 6.46 deg
This is NOT the cone-membership angle.
Exact local zoom: child is outside the green cone
TVA child
57.91 deg
at parent
TV parent
Allowed half-angle: 2.42 deg
