Cone angles: original C0 versus current configurations
Epoch 30 | seed 50 | VAST validation: 2,048 videos x 9 edges = 18,432 edges/config
Cone half-aperture psi
Exterior angle phi
Angular excess: phi - psi
Original C0

Dots: means | Thick lines: P5-P95 across edges | Triangles in right panel: minimum excess
Full cone opening = 2 x psi. Main configurations differ in multiple factors; controlled comparisons are separate.
